Serial No: 09/825,690

Attorney docket No: PF000030

IN THE CLAIMS:

1. (Original) Video transmission system comprising:

a camera including a transmitter for sending image by
radiofrequency and identification means for transmitting a locating signal; and
a directional antenna for receiving the image from the transmitter of the
camera, the antenna including locating means for locating the locating signal and a

2. (Original) System according to Claim 1, wherein the identification means is an optical means.

servo-control means for directing the antenna at the transmitter of the camera.

3. (Original) System according to Claim 2, wherein the optical means is an emitter of visible light.

4. (Original) System according to Claim 2, wherein the optical means comprises an infrared emitter (14).

5. (Original) System according to Claim 1, wherein the locating means comprises a matrix sensor.

6. (Original) System according to Claim 5, wherein the matrix sensor is placed at the centre of the directional antenna.

7. (Original) System according to Claim 1, wherein the locating means comprises at least three detectors.

Serial No: 09/825,690

Attorney docket No: PF000030

8. (Original) System according to Claim 7, wherein the detectors are situated around the perimeter of the antenna.

9. (Original) System according to Claim 1, wherein the locating signal identifies a camera from amongst several cameras.

10. (Currently amended) Video camera comprising a transmitter for sending images by radio frequency and identification means which transmits a an optical locating signal for locating the camera, wherein the optical signal has a predetermined frequency identifying the camera from a plurality of cameras.

11. (Canceled)

- 12. (Currently amended) Camera according to Claim 44 10, wherein the optical means is an emitter of visible light.
- 13. (Currently amended) Camera according to Claim 11 10, wherein the optical means comprises an infrared emitter.

14. (Canceled)

15. (Original) Directional antenna for receiving the images from a camera, the antenna comprising a locating means for locating a locating signal and a servo-control means for directing the antenna at the transmitter of the camera.

Serial No: 09/825,690

Attorney docket No: PF000030

16. (Original) Antenna according to Claim 15, wherein the locating means comprises

a matrix sensor.

17. (Original) Antenna according to Claim 16, wherein the matrix sensor is placed at

the centre of the directional antenna.

18. (Original) Antenna according to Claim 15, wherein the locating means comprises

at least three infrared detectors.

19. (Original) Antenna according to Claim 18, wherein the detectors are situated

around the perimeter of the antenna.
